Computer Science  
Physics  
Mathematics

## SKILLS

- WordPress
- Linux
- PHP/MYSQL
- CENTOS WEB PANEL (CWP)
- HTML/CSS
- Asterisk PBX
- AWS

## WORK EXPERIENCE

**TEMPORARY DEMONSTRATOR** Jan 2012 - Dec 2012

**DEPARTMENT OF COMPUTER SCIENCE | UNIVERSITY OF RUHUNA**

I supported students in practical sessions, providing assistance and guidance to enhance their understanding. Supported technical staff to manage computer labs and infrastructure.

**STARTUP PROJECT** Jan 2013 - Sep 2013

VoIP GSM termination using Asterisk PBX and 3G USB dongles. Successfully managed operations and technology implementation, offering desktop and mobile softphones along with per-minute call packages through our website.

**WEB DEVELOPER** Sep 2013 - Jan 2014

**KOLOURBOX**

I contributed to the development of various web applications using WordPress. My role involved designing and implementing website solutions, ensuring functionality and user experience met client requirements.

**MATHEMATICS AND SCIENCE TEACHER** Feb 2014 - Dec 2020

I instructed students in Mathematics and Science, creating engaging lesson plans and fostering a positive learning environment.

**FREELANCE WEB DEVELOPER / LINUX ADMINISTRATOR** 2015 - 2023

Specializing in web solutions on the Fiverr platform, I've collaborated with numerous clients globally. As a proficient WordPress developer, I excel in creating complete websites, addressing issues, and executing server installations. With a focus on seamless transitions, I adeptly move websites and troubleshoot server-related issues. My commitment to delivering high-quality work has fostered successful partnerships with clients worldwide.

**IT ADMIN (CONTRACT BASIS)** June 2023 - June 2025  
**UNOLUTION**

I manage a dedicated server using CentOS Web Panel (CWP) to ensure consistent uptime and optimal performance. My role includes overseeing email server administration, conducting regular backups, and troubleshooting technical issues to maintain seamless operations. Additionally, I handle WordPress site migrations and backups, ensuring smooth transitions and addressing any challenges that arise. I also manage WordPress sites and demos for the popular ListingPro theme and the Cubewp framework.

**SYSTEM ENGINEER** June 2025 - Present  
**PROCONS INFOTECH**

Currently working as a System Engineer, responsible for managing cPanel hosting accounts and supporting the organization's web infrastructure. I handle WordPress websites, Joomla CMS platforms, and Laravel applications while working closely with the development team. My duties include regular backups and restorations, system and application security enhancements, monitoring server performance, and resolving system-related issues. I also work with AWS, Sri Lanka Government Cloud, and dedicated servers to ensure stable and reliable operations.
